

SVR — Daily Trial Balance · Data Entry Checklist

Tick each line as it is done. Anything in Section A or B, get it right before moving on — the rest of the day is built on it.

A. CRITICAL — carry forward from yesterday, before anything else

Type yesterday's closing figure into today's opening cell. Do not re-read it from the pump and do not round it. On a new tab the three formulas at the bottom must be re-pointed by hand — Excel does not do it when a sheet is copied.

#	What	From yesterday	Into today	Entered By	Verified By
A1	IOCL Stock Reading — Diesel (HS) and Petrol (MS)	C3, C4	B3, B4		
A2	Office pump 11CC2012V-OFF — Last Reading, both nozzles	B7, B8	C7, C8		
A3	Road pump 12BC4523V-RD — Last Reading, both nozzles	B11, B12	C11, C12		
A4	Oil Sale(s) — Opening Stock, every line	E19:E25	D19:D25		
A5	Yesterday's Cash/Book value	D52	D49 must read ='SEP__'!D52		
A6	Yesterday's Trial Balance (most important)	D80	D76 and D97 must read ='SEP__'!D80		

If A6 points at the wrong day, the whole trial balance is built on the wrong opening figure — and every day after it is wrong too.

B. DO NOT TYPE — these cells calculate themselves

Typing a number into one of these stops it calculating, and it will not correct itself when the figures underneath are fixed. On the SEP14 tab, the cells you SHOULD type into are boxed in red; green boxes are already carried.

D. Before you send the day out

#	Check	Where	Done
D1	Cash/Book difference — read F56, not D53, on a day the bank returned money	F56	
D2	Trial Balance difference — call if over Rs 50	D86	
D3	Actual Reported SVR Net Worth — call if it is NEGATIVE, any amount	D100	
D4	Today's Cash/Book Reported — this becomes tomorrow's D49	D52	
D5	Today's Actual Reported Trial Balance — this becomes tomorrow's D76	D80	

Call 1-512-299-0127 if D86 is over Rs 50, or if Net Worth (D100) is negative by any amount.

Rs 50 is the limit (client-confirmed 2026-09-13). The sheet's own printed notes at E53, E86 and E95 still read Rs 100 - go by Rs 50.
